

# Git Contribution Report

## G27

We created an organization in GitHub and created repositories in it. You can view the organization using the below link. Also, we sent an invitation to join the organization to [y3projects@ucsc.cmb.ac.lk](mailto:y3projects@ucsc.cmb.ac.lk) email address

### Organization

Green-Core - <https://github.com/Green-core>

### Repositories

Documents - <https://github.com/Green-core/Documents>

- To handle designs and documentation of the system (All members contributed in design and documentation)

Mobile-App - <https://github.com/Green-core/Mobile-App>

- For the frontend of the mobile app

Mobile-App-Backend - <https://github.com/Green-core/Mobile-App-Backend>

- For the backend of the mobile app

Web-App - <https://github.com/Green-core/Web-App>

- For the frontend of the web app

Web-App-Backend - <https://github.com/Green-core/Web-App-Backend>

- For the backend of the web app

Arduino - <https://github.com/Green-core/Arduino>

- For the IoT device

IoT-Device - <https://github.com/Green-core/IoT-Device>

- For the backend server of the IoT device

# Group Contribution (Script 1)

## Web App

### Repository - Web-App

```
HP@Binara-Medawatta MINGW64 /d/Desktop/Web-App (master)

Binara Medawatta;4;933;0;933;0;3
Kavishka Gamage;2;5;1;4;0.2;2
```

## IoT Device

### Repository - Arduino

```
HP@Binara-Medawatta MINGW64 /d/Desktop/Arduino (master)
$ ./script1.sh
User name;Files changed;Lines added;Lines deleted;Total lines (delta);Add./Del. ratio (1:n);Commit count
Binara Medawatta;14;2271;159;2112;0.0700132;10
```

### Repository - IoT-Device

```
HP@Binara-Medawatta MINGW64 /d/Desktop/IoT-Device (master)
$ ./script1.sh
User name;Files changed;Lines added;Lines deleted;Total lines (delta);Add./Del. ratio (1:n);Commit count
Binara Medawatta;1002;226617;91;226526;0.000401559;6
```

## Individual Contribution (Script 2)

### B A Medawatta - 17001072 (Git username - Binara Medawatta)

#### Repository - Web-App

#### Branch - Development

#### Componentes

- Chat Module for Admins
  - Send Message - for admins to send messages to users regarding vulnerable units
  - Reply Message - for admins to reply messages from users
  - View All Messages - to view all the messages
  - View Single Message - to view single message
  - View New Messages - to view new (Unread) messages
- Navigation - Web App navigation
- The dashboard of the Web App
- Web App template

```

$ export author="Binara Medawatta"

**Repository** - Web-App-Backend

**Branch** - Development

**Routes**

- /chats - API endpoints related to chat module
  - /reply - API to reply message
  - /send-message - API to send message
  - /get-all - API to view all messages
  - /get-one - API to view single message
  - /get-unread - API to view unread messages

- /viewed-message - API to mark viewed messages
- /dashboard - API endpoints related to the Dashboard
  - /get-total-users - API to get the total number of users
  - /get-total-units - API to get the total number of units
  - /get-total-vulnerable-units - API to get the total number of vulnerable units
  - /get-total-unread-chats - API to get the total number of unread chats
  - /get-district-unit-count - API to get the total units of a district for the Map
  - /get-district-user-count - API to get the total users of a district for the Map
  - /get-plant-count - API to get the total number of plants registered in the system

```

**J A N C Niroshana - 17001196 (Git username - Nipuna)**

**Repository** - Mobile-App

**Branch** - Dev/ Master

**Components**

- Units
  - Link units - Helps users to connect new IoT Devices
  - View linked units - View all connected units owned by the user
  - View Unit details - View more details about a unit
- Control actuators - Control actuators related to a single unit
- Account settings - Change the password of the user
- Profile settings - Change username and telephone number related to a user
- Notifications - View notifications related to a user
- Unit details - Details related to a single unit
- Actions - Control actuators related to a single unit
- Tips - View tips related to the plants own by the user

```

**Repository** - Mobile-App-Backend

**Branch** - Dev

**Routes**

- /units
  - Check the existence of a specific unit
  - Update unit
  - Delete unit
  - Get all units related to one user
  - Get data related to one unit
  - Turn actuators on/off
- /plants - Retrieve all plant types
- /users
  - check existing password using ID
  - change the current password of a user
  - change profile-related data of a user

- /tips
  - Retrieve all plant types and id's of them related to a user
  - Retrieve all tips related to a plant
- /notifications - API endpoint to receiving notifications

```

## K C Gamage - 17000475 (Git username - codekcg23)

**Repository** - Mobile-App

**Branch** - dev

**Components**

- Splash screen – Every time the app opens this screen will show up
- Login
  - User can log in with email and password
  - Validation
  - Receive JWT Token to secure all endpoints
  - Persistent login with React context API and Asyncstorage
- Signup
  - Register user
  - Validation
  - Email verification
- Navigation
  - All components navigation
  - Drawer and Stack navigation
- Forgot Password
  - Request email screen
  - Verify code screen

- Reset password screen

```
Kavishka@LAPTOP-MH6J5FLA MINGW64 ~/Desktop/Report/Mobile-App (master)
$ export author="codekcg23"

## Repository - Mobile-App-Backend

Branch - dev

### Routes

- /users/login
  - Check login credentials
  - Generate JWT Token
- /users/register
  - Check signup fields
  - Send email to users with verify code
- /users/forgotPassword
  - Check email field
  - Generate verify code
  - Update user document with verification code and expiration time
  - Send email to the user with verify code
- /users/checkToken
  - Check verify code is valid or expired
  - Update user document to stop another attempt
- /users/resetPassword

- Check password and Confirm Password field
- Update the user's password

```
Kavishka@LAPTOP-MH6J5FLA MINGW64 ~/Desktop/Report/Mobile-App-Backend (master)
$ export author="codekcg23"

Kavishka@LAPTOP-MH6J5FLA MINGW64 ~/Desktop/Report/Mobile-App-Backend (master)

```

## H U K M Pabasara - 17020611 (Git username - minurapabasara)

**Repository** - Web-App

**Branch** - Minura

**Components**

- Admin module
  - View admin details component
    - Admins can see their own details
  - View all admins component
    - Admins can see all admins that are registered
  - View Single admins component
    - Admins can see single Admin profiles that are registered
- Unit module
  - View Vulnerable units component
    - Admin can see the units which are at risk

```

HP@Binara-Medawatta MINGW64 /d/Desktop/Web-App (master)
$ export author="minurapabasara"

HP@Binara-Medawatta MINGW64 /d/Desktop/Web-App (master)

## M.M.H Tharushika - 17001765 (Git username - unknown)

**Repository** - Web-App

**Branch** - hasini

### Components

- Signup Component
  - Register User
  - Validation
- Login Component
  - User can login with email and password
  - Forgot Password
  - Verification
  - Logout
  - Validation

```
HP@Binara-Medawatta MINGW64 /d/Desktop/Web-App (master)
$ export author="unknown"

HP@Binara-Medawatta MINGW64 /d/Desktop/Web-App (master)
$ ./script3.sh
   2 public/index.html
   4 package.json
  16 src/App.js
  27 src/Utils/storage.js
  65 src/components/users-list.component.js
  74 src/components/Viewvulnerableunits.js
  99 src/components/login.component.js
 290 src/components/Home/Home.js
 438 src/components/signup.component.js
1435 package-lock.json
```

**Repository** - Web-App-Backend

**Branch** - hasini

### Routes

- /signup - Api to register new users
  - /register - API to save new user details.
  - /signin - API to signin
  - /get - Retrieve all the registered users.
  - /login - API to login registered users.
  - /verify - API to verify user credentials
  - /forgotpassword - API to change forgot password
- /auth- Generate JWT token

```
HP@Binara-Medawatta MINGW64 /d/Desktop/Web-App-Backend (master)
$ export author="unknown"

HP@Binara-Medawatta MINGW64 /d/Desktop/Web-App-Backend (master)
